## **КЛАСС AUTOBUS**

```
public Autobus (String SP, String FP, int RN, double TT) { //конструктор1
       double TD = Math.abs(TT1 - TT2); //вычисляем модуль разницы
   static void ShortestTrip(double TT1, double TT2, double TT3, double TT4, double
TT5, double TT6) {
       Autobus autobus 6 = new Autobus ();
```

```
autobus4.TravelTime, autobus5.TravelTime, autobus6.TravelTime);
}
```

## РЕЗУЛЬТАТ

```
/Library/Java/JavaVirtualMachines/jc
Difference in trip: 3.0 hour(s)
The shortest trip lasts 7.4 hour(s)
Process finished with exit code 0
```

## КЛАСС TABLE

```
this.Price = 16190;
```

## РЕЗУЛЬТАТ

```
/Library/Java/JavaVirtualMachines/jdk-14
Table 1 is domestic
Table 6 is domestic
The tallest table is 84.0 cm

Process finished with exit code 0
```
